Education

University of Southern California, USA: Master of Science in Computer Science. GPA: 3.5/4.0

Expected May 2025

King's College London, UK: Bachelor of Science in Computer Science.

June 2023

Skills

Java | Python | HTML | CSS | JavaScript | React.js | TypeScript | C++ | SQL | Swift | SwiftUI | Angular.js | NoSQL | Node.js | Express.js | MongoDB | C# | PyTorch | TensorFlow | AML | Docker | Frontend | Backend | Mobile | Fullstack

Projects

Travel Route Optimizer iOS Mobile App

June 2024 - July 2024

Swift, SwiftUI, Python, Flask, PostgreSQL, AWS

- Determined optimal route to visit all places searched given their business hours and driving distance constraints.
- Implemented algorithmic solution to the vehicle routing problem with time windows using Python backend.
- Leveraged Google APIs to allow users to search for locations and scraped requests to obtain business hours.
- Utilized AWS relational data storage to create a backend RESTful API to make notes for locations.

Stock Exchange Web App

Feb 2024 - Apr 2024

Angular, TypeScript, Node.js, Express.js, MongoDB, PyTorch, Bootstrap, Google Cloud

- Created a backend RESTful API for actions on stocks such as buying, selling and favoriting.
- Reduced price chart rendering latency by 4 seconds and avoided reaching API rate limits by using local cache.
- Implemented dynamic UI and database interactions using Angular Pub-Sub model to create seamless UX.
- Developed auto-complete search box for stock tickers using debounce to reduce API requests by at least 2x.
- Created a predictive model using Long Short-Term Memory (LSTM) RNN to forecast stock price growth.

Real Estate Insights Google Chrome Extension

Nov 2022 - Mar 2023

React, TypeScript, Node.js, Express.js, Material UI, Jest, Webpack, AML

- Published my [extension](#) on the Chrome Web Store.
- Browser extension to surface additional information on properties when browsing Zillow and Realtor.
- Leveraged Google Cloud Nearby API to reveal food, health, transport and education insights for the property.
- Trained a gradient boosting machine model leveraging the above insights to predict house prices.
- Leveraged Azure Machine Learning (AML) to train, evaluate and deploy the price prediction model.

Book Recommender Machine Learning Web App

Feb 2022 - Mar 2022

Python, TensorFlow, Pandas, NumPy, HTML, CSS, JavaScript, Django, SQL

- Led a team of 7 to create an app to recommend books to users.
- Implemented collaborative filtering book recommender using KNN and compared it against an SVD algorithm.
- Trained on a dataset of 200,000 books and evaluated using RMSE and found SVD to be 15% lower.
- Decreased latency of recommendations by 5 minutes by using batch learning to avoid retraining the model.
- Trained a long short term memory model with CRF layer to do name entity recognition from descriptions.

Awards

LAMDA Public Speaking Grade 6 Distinction | National Citizen Service Challenge | Piano ABRSM Grade 5

Volunteer Experience

- Collaborated with 3 teachers to organize sports events at Foxborough school as the student leader.
- Supervised 10 elderly patients and caregivers in weekly meetings at Dr French Memorial Home.
